Objective

I am looking for an opportunity to contribute to a company where my skills as a product strategist and development leader can help deliver superior software on time at a high quality.

Experience

Independent / Freelance Developer & Builder
APRIL 2023 - PRESENT, Austin, Texas and New York, New York
Over the past year, led and collaborated on innovative AI, blockchain, and NFT projects. Partnered with Peelander Yellow on MONMONMON, impacting the NFT/gaming sector. Developed bizqiz, a marketing platform, and CVRLTR for job tools. Enhanced NFTNYC engagement with MonkeDAO, showcasing blockchain's community impact.

Darkblock / Chief Technology Officer
FEBRUARY 2022 - APRIL 2023, Austin, Texas and Washington, DC
Responsible for overseeing and directing the technical aspects of the Darkblock protocol. This includes managing the development and implementation of technology and systems, as well as researching and evaluating new technologies that could benefit the company. These included support for 5 chains, dApp, TV app, mobile app, Chrome extension, API and npm strategy, and partner integrations.

ScreenDUET / CEO and Founder
SEPTEMBER 2020 - FEBRUARY 2022, Austin, Texas
Designed, developed and brought to market a real time interactive content system used by marketing and sales organizations who want to get information from their audience at live events. Built to scale and used by some of the world's most famous brands.

Via TRM / Vice President of Product and Engineering
OCTOBER 2019 - JULY 2020, Austin, Texas and Boulder, Colorado
Brought reliability and scalability to platforms used across the world by students at almost 100 universities and institutions. Introduced new products to the space that reduce risk management and engage with students via social media. Managed a product engineering team and roadmap for the future of the product.

API Abroad / Vice President of Technology
SEPTEMBER 2018 - AUGUST 2019, Austin, Texas
Responsible and managed full IT functions including software development and technology operations. Architected, negotiated and rolled out an ecosystem of world class SaaS solutions and updated best-in-breed custom software implementations.

Algebraix Data / Mobile Architect and Product Manager
JULY 2017 - JANUARY 2018, Austin, Texas
Member of the executive team responsible for developing mobile crypto wallet. Worked closely with brilliant developers to reduce the roadmap timeline to a fraction of initial estimates.

Education

University of Texas at El Paso / English, Philosophy, Literature
August 1988 - September 1992, El Paso
